

chroma+scan 2000 FAMILY

FAST 3D LOG SCANNING

The chroma+scan 2000 family of sensors integrate both high-speed and high-density 3D scanning for linear travel log optimization.

Detailed 3D log profiles provide all the measurement information to make rapid and quality first cut decisions. In the evolution of value-added optimization, the chroma+scan 2000 Family provides a higher level of recovery for primary breakdown and all other down stream processes.

- RANGE & SPEED PERFORMANCE
- OCCCLUSION FREE SCANNING
- DEAD ZONE EDITING

LMI Technologies Inc. is a market leader in fast, accurate, and reliable scanning technology for the wood processing industry. Today we have over 60,000 sensors operating in the field. LMI Technologies Inc. provides responsive, reliable, scanning technology for better optimization solutions for industry.
